Experience

•Xalts **Bangalore**

Senior Software Developer *March 2025 - present*

– Architected the common high-level design for the Sparc platform, for self-deployment based clients and clients that will use service as saas.
– Implemented an authentication layer to support secure onboarding and verification/subscription for self-deployed clients and Saas clients.
– Implemented secure client credential and key management modules, enabling reliable access control through private/public key handling

Technical Skills: Java, spring boot, postgres, MongoDB, AWS, Grafana.

Soft Skills: Ownership, Teamwork, Time Management, Communication, Presentation Skills.

Software Developer *Oct 2023 - Feb 2025*

– Led the design and development of a comprehensive token management service, encompassing user creation, permission management related to token, and token transaction history tracking, bridging web2 and web3 technologies.
– Implemented task scheduling cron service to run workflows on intervals.
– Implemented Git submodules to manage shared static files, interfaces, and database schemas across multiple microservices, ensuring consistency and updates.
– Enhanced the performance of data-intensive APIs by implementing schema indexing and optimizing data retrieval through selective projection at the database layer, resulting in a 40% decrease in latency from 3.4 seconds to 2.1 seconds.

Technical Skills: Java, Nodejs, MongoDB, RabbitMQ, AWS, EC2.

•Slice **Bangalore**

Software Developer *July 2022 - July 2023*

– Successfully integrated physical card booking with an additional Delivery Partner (India Post), **resulting in a 6% increase in the physical card success delivery rate**.
– Led the migration of a Node.js project to Nest.js for improved maintainability and refactored legacy code.
– Implemented Kafka for asynchronous retries, replacing regular crons.
– Refactored and resolved major security bugs in OTP generation and verification process using Redis.

Technical Skills: Nodejs, Javascript, Mysql, MongoDB, Kafka, PubSub, AWS, EC2, Kibana.

Software Developer Intern *Jan 2022 - June 2022*

– Gained hands-on experience in creating robust and performant APIs using Node.js as the backend runtime and MongoDB as the NoSQL database.
– Implemented AWS Step Functions for asynchronous flow of card management service.

Technical Skills: Nodejs, Javascript, Mysql, MongoDB, AWS, Step Functions, EC2.

•Walmart Global Tech India *May 2021 - July 2021*

Software Developer Intern Bangalore

– Identified and resolved CSS issues to enhance the user experience of a web application.
– Developed the UI for a feature enabling users to make dispute requests.
– Added ESLint pre-commit hooks for linting issue detection and resolution.

Technical Skills: Javascript, ReactJs.

Education

•Indian Institute of Information Technology, Allahabad *2017 - 2022*

Integrated B.Tech+M.Tech(Major: Artificial Intelligence) CGPA: 8.41

Publications

•PCIL-IDS *Jan 2020 - May 2020*

Partial Consensus and Incremental Learning-Based Intrusion Detection System.

– An effective and lightweight intrusion detection system for network security combining incremental learning and a lightweight consensus algorithm.

Achievements & Awards

– PCIL-IDS accepted at 2nd International Conference on Cybernetics, Cognition and Machine Learning, Goa, India.
– Implemented Safe route navigation app that was selected and funded under the **NewGen IEDC** and stood 3rd among the most innovative projects in the college
– Got 835 Rank in codeforces round 685 div2.
